

System

SILENCE LOFT

SILENCE LOFT

The double-glazed aluminium and glass mullion wall system creates a unique character of any interior.

The mullions are made of light and very durable aluminium, therefore the entire system is a stable, safe structure and a modern element that matches various types of spaces perfectly well. Aluminium profiles with a height of 25 mm or 30 mm are the subtle and durable base of the system. Silence Loft is characterised by acoustic insulation of up to 48dB that guarantees a comfortable work environment.

Glazing	Acoustic insulation Rw
VSG 33.1+ VSG 33.1	40dB
VSG 33.1+ VSG 55.1	43dB
VSG 55.2Si + VSG 66.2Si	48dB

Double or single-glazed system

Structural profiles 25 or 30 mm high and 78 mm wide in any colour from the RAL palette

Maximum height 4036 mm

Aesthetic and minimalist design

A possibility to install both horizontal and vertical mullions
