

System IN SILENCE

Rw up to 53 dB

Supports
acoustic comfort

Elegant design

The IN SILENCE system with a double glazing system will prove its worth wherever acoustic comfort is important (the acoustic insulation of this system is Rw 53 dB). The structural profiles, with a width of 125 mm and a height of 30 mm, give the system an elegant and modern character, while an option of choosing open or closed frames and various options of hinge installation allow for flexibility in adapting to the specific requirements of each project.

Double-glazed system

Structural profiles 30 mm high and 125 mm wide

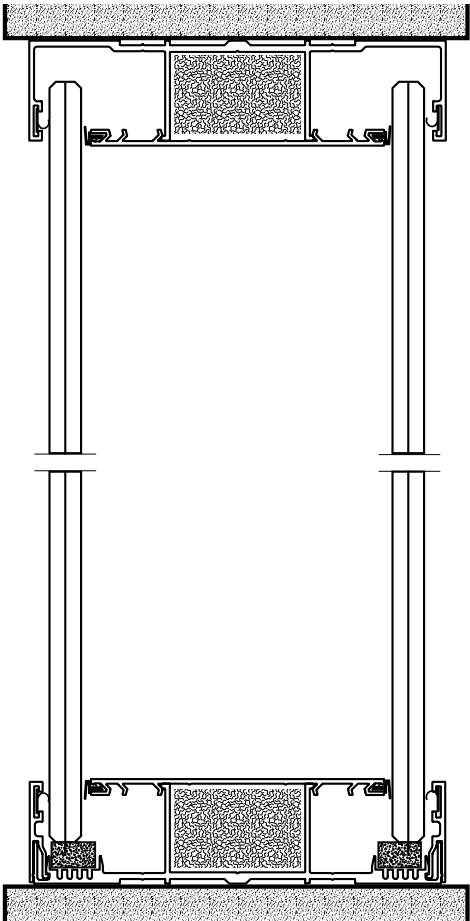

Maximum height 3500 mm

Aluminium profiles: powder-coated according to RAL palette

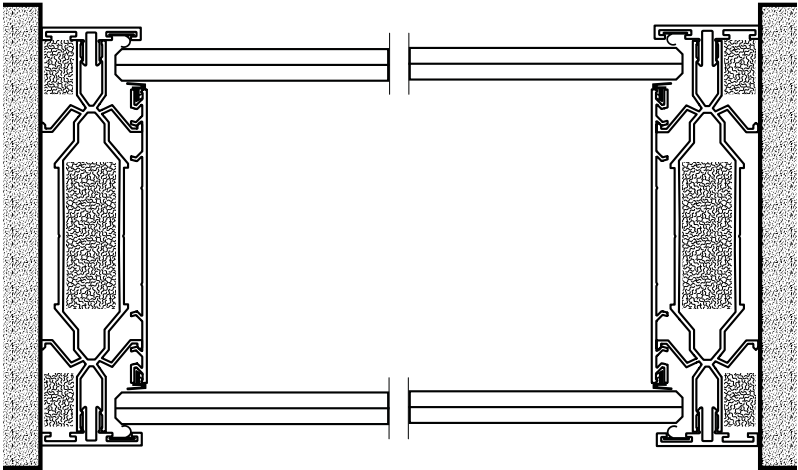

Aesthetic and minimalist design

Invisible gaskets
